

MITCHELL'S BAY, located on the east shore of Lake St. Clair, in Dover township, about 17 miles by paved road from Chatham, is a mecca for fishermen both summer and winter. Black bass, muskies, pickerel are among summer favorites, perch are an attraction for winter fishing through the ice. There is good duck hunting in the fall in nearby marshes. Power boats from American ports are frequent summer visitors, and many fishermen launch their boats here to ply the nearby waters.

Hi:  
Guess who  
this is.
